SUMMARY

Senior Full Stack Developer with **9+** years of experience and a strong specialization in Artificial Intelligence and applied Data Science, backed by a Master's in Data Science and a Bachelor's in Computer Science. My recent work centers on Agentic AI, Retrieval-Augmented Generation (RAG), and machine learning–driven automation, complemented by solid foundations in data analysis and scalable software engineering alongside foundation models in forecasting. I am keen to build on this experience through doctoral research and contribute meaningfully to advanced work in the field.
